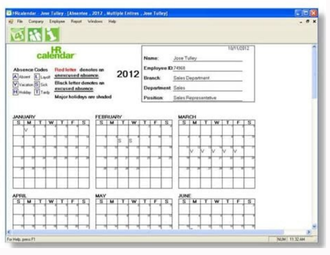
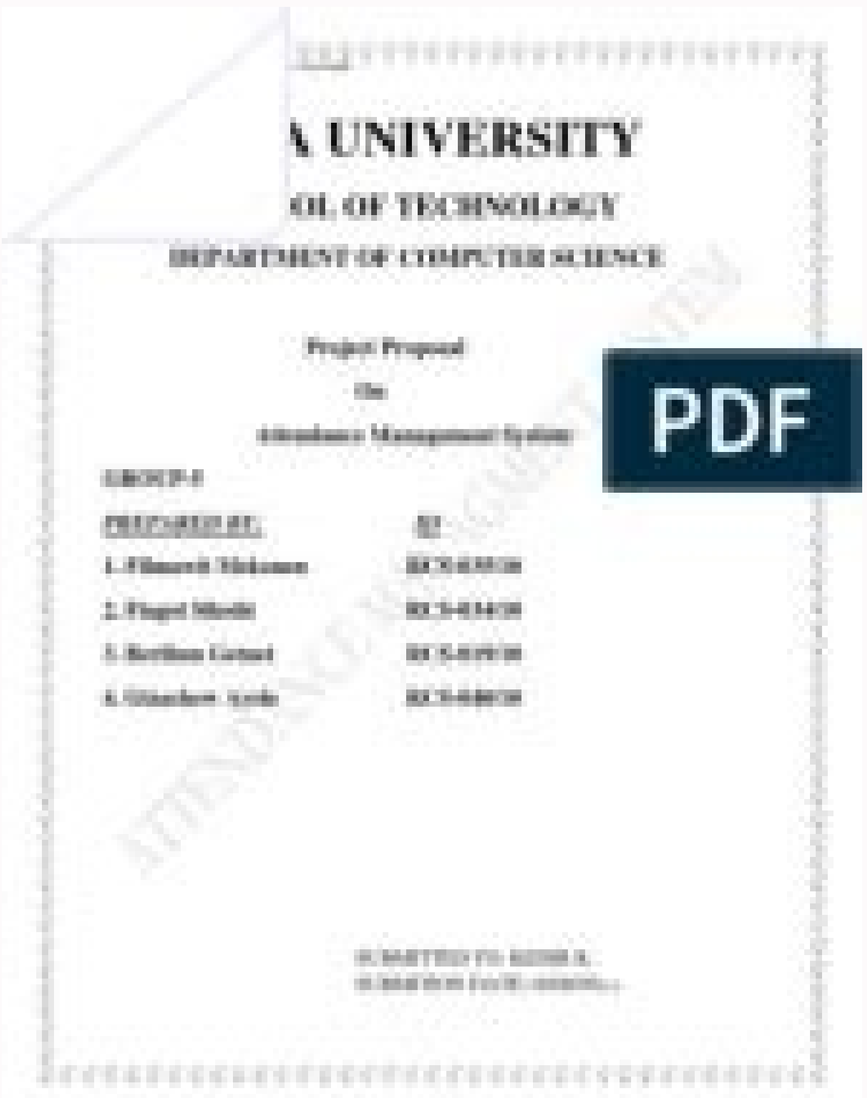
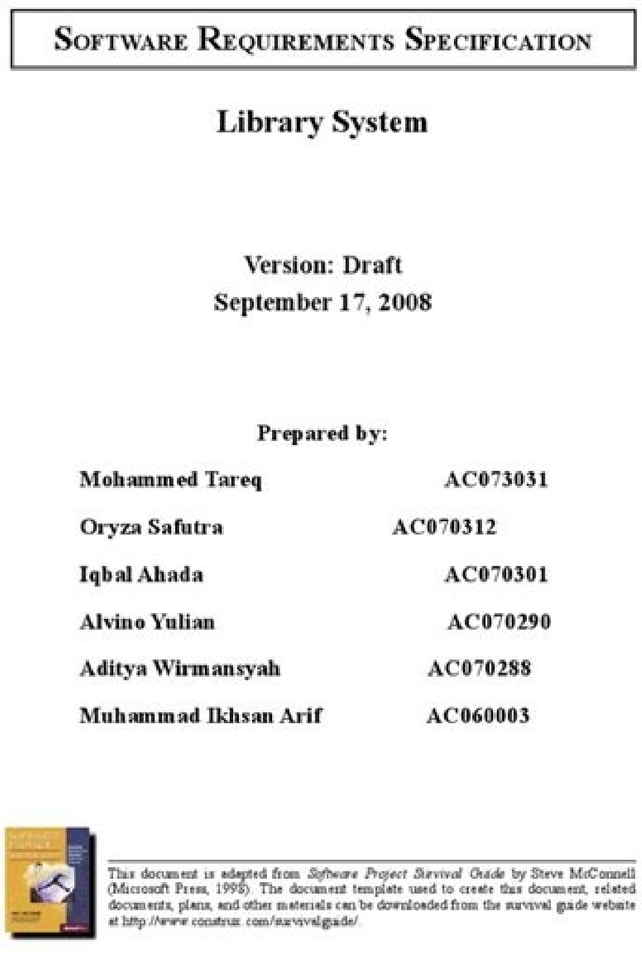
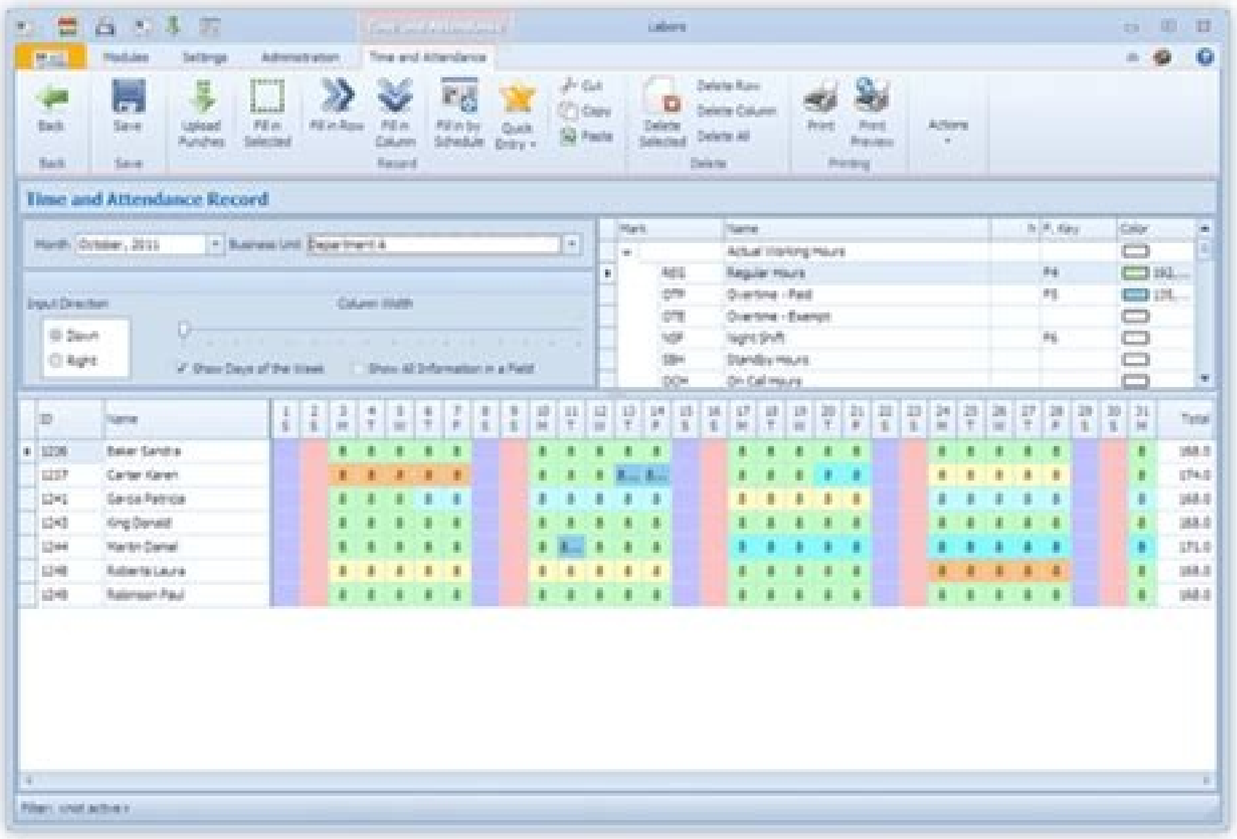
Srs document for student attendance management system pdf files online









Functional Requirements: ● Registered Lecturers: ○ He or she can add classes. Use-case Diagram 7. Introduction 1.1 Purpose Page 4 The Aim of this Web App is to provide an easy and intuitive way to track attendance of students.This makes it easier for the attendance coordinator to manage attendance of different departments and respective students. 2.3 User Classes and Characteristics Administrator: The administrator will have overall control over the system.The admin maintains the site and service. How would you improve/expand this system? Functional Requirements 4. ○ If no network connection can be established to receive the roll information, the instructor shall be allowed to e ○ nter roll later. Overview 2. 2.5 Design and Implementation Constraints ● ● ● ● 2.6 The time allotted for this project will be limited to the end of this semester. During peak times of usage (9:00 AM to 2:00 PM). Software Requirements Specification for Attendance Management Software Page 2 Software Requirements Specification for Attendance Management Software Version 1.0 Prepared by Sanjay C. Attendance Percentage of each student in every subject would be displayed in this list Also, the system allows the professor to view pertinent statistics on student’s attendance record for the specified class. External Interface Requirements 3.1 3.2 3.3 3.4 User Interfaces Hardware Interfaces Software Interfaces Communications Interfaces 4. The updated password shall be stored in the instructor database and on the instructor’s PC. Product Scope The scope of this project is developing a attendance tracking product system which can be used in by lecturers to manage their class’s attendance. Class and Student Management. The SRS fully describes what the software will do and how it will be expected to perform. External Interface Requirements 3.1 User Interfaces ● The Attendance Management System shall provide details of students in the class to aid in taking roll. Database The Attendance Management System will communicate with the database to perform the following options. 2.2 Product Functions The main feature of the Attendance Managemant System is that it keeps a record of all essentials details of each individual student.At the end of a specified period this system create a defaulties list as well as the nondefaulties list. All the Information’s are handled manually in the registers or other documents. 1.3 References ● Website: url [cse870/IEEEXplore-SRS-template.pdf] ● Website: url [ ] ● Website: url [- www.wikipedia.com] ● “Roger Pressman”,”Software Engineering”,Seventh Edition, Page: 119-153 2. Limitations of the Existing System ➢ The Current system is completely manual. Suggestions & online survey: ○ This section helps the organization to fulfil the new customer's demands ● ● ● ● about the products, service, user-interface, etc. Internet-startup blog Playing With Wire explains how Mac users can create a digital filing system for notes, receipts, financial records and other documents.You'll need a scanner (preferably one with an auto document feeder), a PDF utility called PDFLab and loads of free time. ○ An instructor shall be allowed to change his/her password only by supplying his/her existing password. All the HTML code for the user manual will conform to the HTML 4.0 standard. Actors: ● ● ● Staff Administrator System ● ● ● ● ● ● ● ● ● ● ● Login Manage registration process Enroll new user manage data storage print attendance report logout view attendance report submit report edit details export data to excel Use-case: Software Requirements Specification for Attendance Management Software Page 12 Conclusion: The requirements of all the entities are taken care of to be fulfilled. Product Functionality 3. User Documentation 7. ➢ Trade-offs may be between hardware and software issues. Lulla Monish K. The system proves to be a helpful source for the Colleges to manage attendance easily and without involving much complex calculation. ● If the user forgets to transmit the information, the system will automatically send it for them at the end of the class. The management becomes comparatively easy and also efficient giving more time to the users to focus on other important issues. Table of Contents 1. Operating Environment 5. User Interface 2. ● The Attendance Management System will record all the essentials details of each particular student. ● For attendance policies, since professors do not usually tabulate tardiness, it is assumed a student is either present or absent. The Attendance Management System is intended to replace the manual model of attendance record Software Requirements Specification for Attendance Management Software Page 5 keeping by means of roll call and paper records. The Attendance Management System will communicate to the database through Internet. ● The user will be allowed to modify attendance records at any time. Functional Requirements 5. ● The program will provide a page that produces current statistics on class attendance 3.2 Hardware Interfaces Server Side: ● ● ● Operating System: Windows 7/xp ,Windows ME Processor: Pentium 3.0 GHz or higher RAM: 1 GB or more Hard Drive: 10 GB or more Client side: ● ● ● Operating System: Windows 7 or above, MAC or UNIX. Specific Requirements 1. ● Class data being used for setup and student recognition is dependent on information in a database administered outside of the capabilities of the Attendance Management System. Since the existing Attendance Management System of the Institute is totally working manually. Introduction 1. ● Statistics on student attendance is dependent on a professor’ s consistent utilization of the system for each class period. Functional Requirements Definition ➢ Functional requirements are a subset of the overall system requirement. ● Provide Registration Form: ○ Allows users to fill the sign-up forms and get registered ○ It allows customers to rate the products and services. It allows students to view their attendance and also enables attendance department to generate different attendance reports. Design and Implementation Constraints 6. Purpose 2. The system also assumes that detail regarding each student would be made correctly. The procedure is pretty simple: scan your documents, import them into PDFLab and batch-convert them to PDFs. This isn't an ideal solution, as it provides no real organization for your newly electronic documents, but it does get you started down the digital-filing-cabinet road. ❖ Admin o Add & Modify details of ■ student ■ faculty ■ subject ❖ Office Staff o Generate various types of reports o Send notice to black listed students ❖ Faculty o Attendance on basis of ■ subject ■ day by day o Check various generated Reports Existing system The type of the system any institute uses always plays an important role in management of the institute. ○ Queries upon the database shall be performed in less than 5 seconds. ● The Attendance Management System shall interface between Windows CE designated to store the attendance records. Better the form, efficiency and accuracy of the system, the easier would be the management tasks. Put your thoughts on digital paper (i.e., in the comments).Windows users seeking a similar solution should check out Docsvault, which offers a complete digital filing system for scanned documents. Conclusion Page 3 Software Requirements Specification for Attendance Management Software 1. It also targets normal lecturers for keeping track for attendance and thus taking and managing attendance online. Take online attendance: ○ It allows to take attendance roll number wise and store them in database. Overall Description 1. ○ Transmission of roll data shall occur in under 5 seconds. ○ He/she can add students to that class. ○ Upon start of the roll program, roll information shall be displayed on the instructor‘ s Pocket PC within 10 seconds. Scope 3. Features includes: ● ● ● ● 1.2 Online Attendance Tracking Employee Reporting Calculate Defaulter Categories. ○ Email messages to absent students shall be sent within one hour of the conclusion of a class. So when a system is analyzed to gather its functionalities use cases are prepared and actors are identified. Assumptions and Dependencies 3. 3. ● Software Quality Attributes ○ The system shall be available to all instructors through Information Systems during their normal hours of operation. Other…show more content…For this application we have provided the following modules and features. Software Requirements Specification for Attendance Management Software Page 6 Figure 1: Context diagram for Attendance Management System. Non-functional Requirements Definition ➢ It measures the documentation and the inputs for the various requirements in the system. 4. ○ Passwords shall be stored in an instructor database and verified upon each session of roll or database modification. Communicational Interfaces 5. Aim: To learn & implement SRS. The interface would be viewed best using 1024 x768 and 800 x 600 pixels resolution setting. Devnani 19 January 2016 Software Requirements Specification for Attendance Management Software Table of Contents Table of Contents 1. iii. ➢ These requirements are used to consider system behavior. Use-Case Diagram : Software Requirements Specification for Attendance Management Software Page 11 The purpose of use case diagram is to capture the dynamic aspect of a system. ii. ○ The system shall be able to be reused for each new semester. RAM: 1 GB or more Software Requirements Specification for Attendance Management Software 3.3 Page 8 Software Interfaces Attendance Management System ● This software will transmit the attendance of a class to a database on a machine via Internet. ○ Lecturer can take attendance online. Overall Description 2.1 2.2 2.3 2.4 2.5 2.6 2.7 Product Perspective Product Functions User Classes and Characteristics Operating Environment Design and Implementation Constraints User Documentation Assumptions and Dependencies 3. But this definition is too generic to describe the purpose.Use case diagrams are used to gather the requirements of a system including internal and external influences. It maintains classes, keeps a track of the students. This password shall be stored on the instructor‘ s PC after initial entry in order that it must only be entered once. 3.4 Communications Interfaces ● ● 4 The security of a user must be consistent through the use of passwords. ● Pentium 3.0 GHz or higher RAM must be 1 Gb or more and Hard Drive 10 GB or more. It has privilege to access the entire system and distribute the permissions to group of users. Non - Functional Requirements ● Security: Security is concerned with the privacy of client’s personal information.The attendance made by the clients are dealt confidentially.The complaints and suggestions made by customers must be only accessed by administrative authorities. Intended Audience 4. ○ The program shall support taking roll for class sizes of up to 100 students. You can download the paper by clicking the button above. ○ The system shall allow for addition or deletion of instructors, students, and classes while incorporating new semesters. Processor: Pentium III or 2.0 GHz or higher. ○ If a network connection is lost during roll, the program shall allow the instructor to transmit roll information at a later time. 2. ○ Usability of the system shall be achieved through an online help pages and an introductory training session for all instructors upon installation of the program on their Pocket PCs. 7. Overall Description 2.1 Product Perspective The Tracking software can be accessed Online in which the organisation intends to track.The site allows to take and store attendance online and store it in database.It enables users to generate various reports on attendance. You're Reading a Free Preview Pages 4 to 6 are not shown in this preview. ● To allow a user to enter attendance. ○ And hence enhance the product functionality and improves services. Programming is done in JAVASCRIPT, SQL, HTML. The features expressed in this Software Requirements Specification document are intended to be fully implemented in version 1.0. Then system will be developed in such a way to provide easy addition of enhanced features, which may be desired in subsequent versions. Definition, Acronyms, and Abbreviations 5. This entails the system to operate on the Windows CE platform. ○ Due to the use of a wireless network, reliability of the system at all times is not guaranteed. Behavior Requirements 4.1 Use Case View 5. Technologies to be used 7. However, overall reliability of the system and roll information shall be achieved through the process of database manipulation. ○ Acknowledgement of roll received (confirmation) shall be returned within 8 seconds. The process of the work is mainly divided in two parts, first is to take attendance on sheet & enter details into the registers. These requirements are mostly design requirements. Professors will be able to view details regarding attendance of individual students on their PC and quickly maintain attendance records. Windows only: Organize, manage, search and archive all your documents with Docsvault Home Edition.Read moreBye Bye Binders, I Won't Miss You at All [Playing With Wire] Loading PreviewSorry, preview is currently unavailable. The roll call and paper records are replaced with a single interaction between the professor and the Attendance Management System. It also assists the other departments like attendance and HR department. ● Browser Compatibility and Responsive: It ensures that the site runs consistently in all browsers without making change in Style of web page.Responsiveness ensures it works on every screen resolutions like mobile , tablets, desktop PCs. ● Performance Requirements ○ The program must be able to be run concurrently by multiple professors. The Web Server and Database Software have not been established at this point. With a maximum class size, performance must still conform to all performance requirements. So the wastage of time occur the most over here. ● All modifications to the database will be done through a keyboard. User and Characteristics 4. Background: A software requirement specification (SRS) is a comprehensive description of the intended purpose and environment for software under development. ○ As it is connected via LAN and MAN an antivirus has been installed on system for its safety purpose Software Requirements Specification for Attendance Management Software ● Security Requirements Page 10 ○ An instructor shall permitted to view and edit absence information in the database for only his/her classes. Prerequisite: The general format of SRS consists of: i. The language for the project will be PHP at the server side.. User Documentation ● The system will provide an online user manual in HTML that describes the functionality and options available to the user. Objective: To implement Software Requirement Specification (SRS) and design the documentation for given project. Lecturer: Lecturer is responsible in taking attendance. In today’s circumstances where there is Software Requirements Specification for Attendance Management Software Page 1 Experiment-1 (Requirement Specification) 1. Product Perspective 2. Report generation: ○ Monthly reports ○ Student wise reports ○ Defaulter List Manage the attendance of students for special lectures. ○ In order to take roll or edit database information, the instructor shall be required to enter a password. Software Interface 3. ● Safety Requirements ○ System would be protected by a password. Software Requirements Specification for Attendance Management Software Page 9 5. ● To allow a user to query a system to gain statistics concerning individual and class attendance. ● These details can be clicked with a mouse in order to view a particular student’s attendance record. Nonfunctional Requirements 6. It targets large organizations which include many classes and Students. And then at the end of the session or semester attendance is calculated manually & reports are generated. Software Requirements Specification for Attendance Management Software Page 7 ● The system will provide a hard copy of the user manual, which is identical to the manual outlined above 2.7 Assumptions and Dependencies ● The database mentioned within this Software Requirements Specification document is previously administered with the correct information needed by the Attendance Management System. Introduction 1.1 Purpose 1.2 Product Scope 1.3 References 2. 2.4 Operating Environment ● The Attendance Management System shall function on the PC provided by the college. Hardware Interface 4. System Evolution ➢ Starting from the specification and the database schema, on how the system should be designed. ● Maintainability: The maintainability requirements are concerned with the maintenance issues of the system.The report time of Attendance Tracking System shall be under a half hour.System downtime for maintenance should be less than 6 hours per quarter of a year. Finally, another feature of Attendance Management System is its flexibility and ease of use. ● Application will be accessed through a Browser Interface. ● To allow a user to modify attendance. References 6. Narwani Praveen M. Student: They are allowed to only view their attendance details for knowledge . ○ He/she can view the attendance according to the date.

04.11.2017 · SRS: System Requirement Specification WWW: World Wide Web MySQL: is a RDBMS based on SQL which is used for adding, removing, and modifying information in the database. 11. 11 RDBMS: Relational Database Management System HTML: Hypertext Markup Language PHP: Hypertext Preprocessor CSS: Cascading Style Sheet HTTP: Hypertext Transfer Protocol 1.4. Data stored on a CD device (direct-access) can be accessed either sequentially or randomly. Types of Files used in an Organization System Following are the types of files used in an organization system: Master file: It contains the current information for a system. For example, customer file, student file, telephone directory. This project on “IIMSR Student Management System” is useful for easy user interface. The system utilizes the powerful database management, data retrieval and data manipulation. ... (SRS). 1.1 Purpose This document provides the technical description of all software requirements of STUDENT MANAGEMENT SYSTEM. ...

INTEGRAL UNIVERSITY Page 41 ... Get 24⁄7 customer support help when you place a homework help service order with us. We will guide you on how to place your essay help, proofreading and editing your draft – fixing the grammar, spelling, or formatting of your paper easily and cheaply. With course help online, you pay for academic writing help and we give you a legal service. This service is similar to paying a tutor to help improve your skills. Our online services is trustworthy and it cares about your learning and your degree. Hence, you should be sure of the fact that our online essay help cannot harm your academic life. 18.11.2015 · Student Information System Software Requirement Student Information System Software Requirements Specification & Analysis Student Information System Specification & Analysis 8. 1 Chapter 1 Introduction 1.1 Purpose This document is the Software Requirements Specification (SRS) for the IIT, DU Student Information System (SIS).
